

SEMINAIRE du Service d'Astrophysique

MASERS AND STAR FORMATION IN THE PERSEUS SPIRAL ARM

Andrej SOBOLEV

(Astronomical Observatory, Ural State University, Ekaterinburg, Russia)

Mercredi 22 novembre 2006

11h00

It will be described what do masers tell us about the objects in the regions of star formation. Advantages of observations of the objects from Perseus Spiral Arm will be described. Importance of star formation research and peculiarities of star formation in this galactic structure will be discussed.

Ce séminaire aura lieu au CEA Saclay - Orme des Merisiers - bâtiment 709, Salle 003.
