1 PRELIMINARY REMINDERS

1.1 Time and Key Signatures

1.1.1 Keys

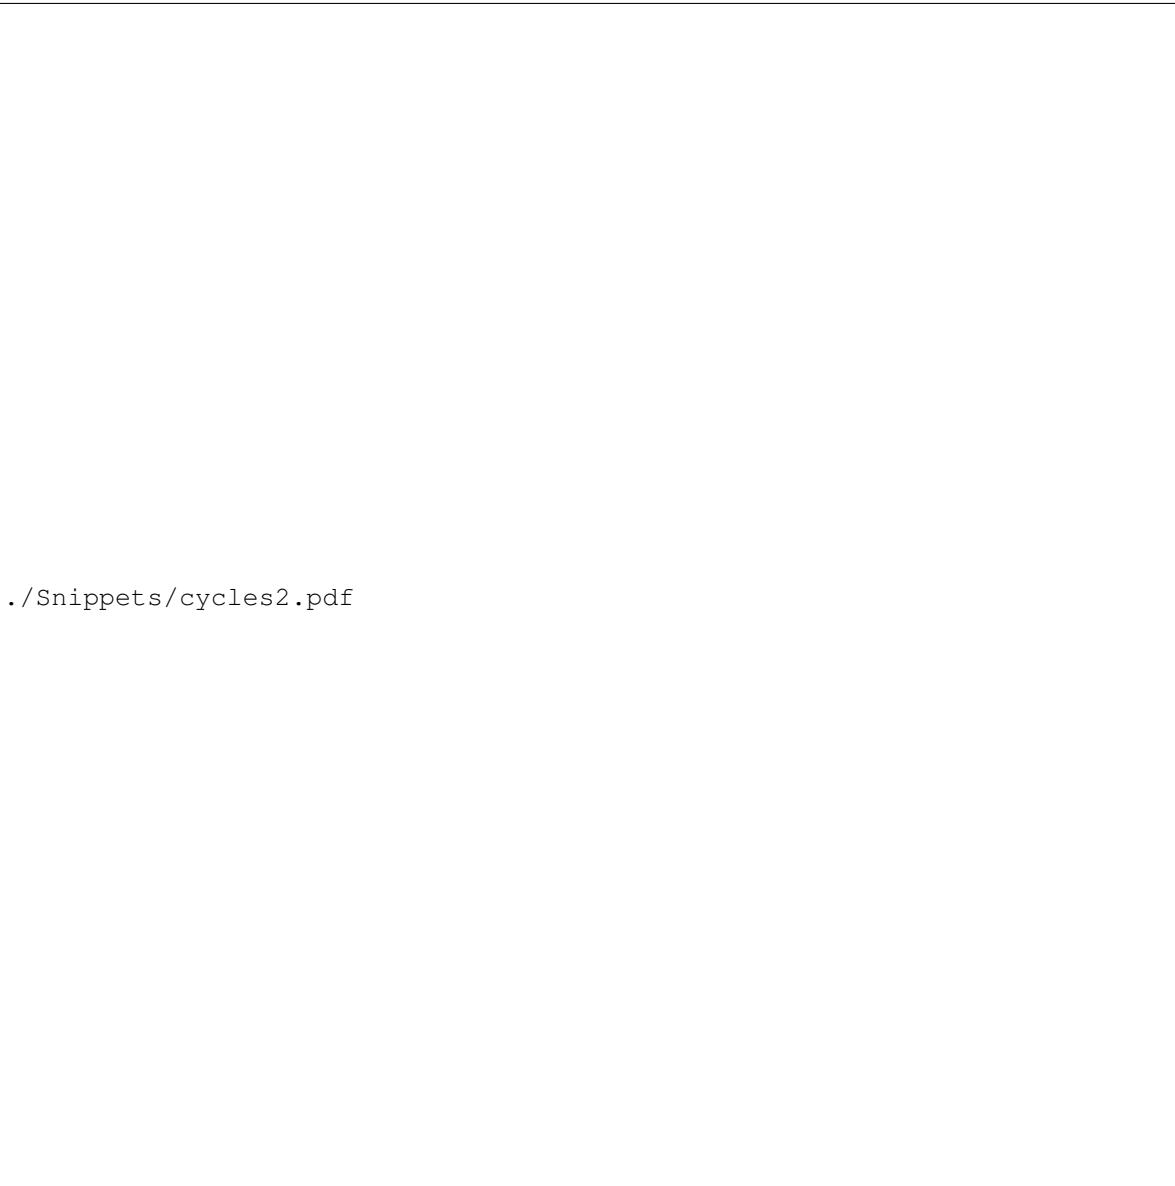

1.1.2 Tempo ranges

| Jazz tempo | Classical tempo | BPM |
|------------------------------|--------------------|-----------|
| Very fast | ... | > 290 |
| Up tempo, fast | ... | 230 - 290 |
| Medium-up tempo, medium fast | <i>prestissimo</i> | 180 - 230 |
| Medium tempo, moderate | <i>allegro</i> | 120 - 180 |
| Walking tempo | <i>moderato</i> | 100 - 120 |
| Slow swing | <i>andante</i> | 80 - 100 |
| Medium ballad | <i>adagio</i> | 60 - 80 |
| Slow ballad | <i>largo</i> | 40 - 60 |

1.2 Interval Cycles

./Snippets/cycles1.pdf

./Snippets/cycles2.pdf

2 UNIQUE MELODIC ELEMENTS

2.1 Triads

The four triads formed by combining major and minor thirds are the following. The most useful way to play them are:

- in the five CAGED positions;
- in the six two-and-one-notes-per-string positions.

| | | | |
|------------------------------------|-------------------------------------|--|---|
| <i>Major triad</i> C | <i>Minor triad</i> Cm | <i>Diminished triad</i> C° | <i>Augmented triad</i> C+ |
|------------------------------------|-------------------------------------|--|---|

The two most useful harmonizations, easy to play on the guitar, are the following. The compact forms can be played on adjacent string groups. The drop-2 forms have one or two string skips, depending on the inversion and on the quality of the chord.

| | |
|---|---|
| <i>Compact form</i> C C/E C/G | <i>Drop 2</i> C C/E C/G |
|---|---|

2.2 Sevenths Chords

There are seven four-note arpeggios obtained by combining major and minor thirds, the eighth one being only the augmented triad with the root repeated one octave higher. The most useful way to play them are:

- in the five CAGED positions;
- in the four two-notes-per-string positions (go well with slurring);
- in the eight three-and-one-notes-per-string positions (go well with economy picking).

The image shows six musical staves, each representing a different type of seventh chord arpeggio. The staves are arranged in two columns of three. The first column contains: 'Major seventh' (C Δ), 'Dominant seventh' (C 7), and 'Half diminished' (C \emptyset). The second column contains: 'Minor major seventh' (C $m\Delta$), 'Minor seventh' (C $m7$), and 'Diminished seventh' (C $º7$). Each staff has a treble clef and a key signature of C major.

These arpeggios can be arranged in different chord forms.

- The compact form can be played on the guitar mostly in its fundamental inversion. The other inversions are playable only in the higher register, using open strings, or with a non-standard tuning such as Frank GAMBALE's.
- Drop-2 forms can be played on adjacent string groups (there are thus three unisons of each chord on the guitar neck).
- Drop-3 forms can be played with a detached bass (thus two unisons per chord).
- Drop-2,3 forms can be played with a string skip in the middle (thus two unisons per chord).
- Drop-2,4 forms can be played with a detached high note (thus two unisons per chord).
- Drop-2,3,4 forms can be played with the bass on the low E string and the three other notes on the three high strings (thus only one unison per chord).

The image shows six musical staves, each representing a different chord form. They are arranged in two columns of three. The first column contains: 'Compact form' (C Δ , C Δ/E , C Δ/G , C Δ/B), 'Drop 3' (C Δ , C Δ/E , C Δ/G , C Δ/B), and 'Drop 2,4' (C Δ , C Δ/E , C Δ/G , C Δ/B). The second column contains: 'Drop 2' (C Δ , C Δ/E , C Δ/G , C Δ/B), 'Drop 2,3' (C Δ , C Δ/E , C Δ/G , C Δ/B), and 'Drop 2,3,4' (C Δ , C Δ/E , C Δ/G , C Δ/B). Each staff has a treble clef and a key signature of C major.

In addition, two categories of incomplete chords can be very practical.

- Shell voicings*, are efficient for staccato punctuation or quarter note comping. They sound a bit lacking when held for a long time.
- Octave chords* have a repeated note:
 - Regular octave chords can be played on the same string groups as Drop-2;
 - Double octave chords can be played on the low E, D, G and high E strings.

Shell chord, compact

Octave chord

Shell chord, detached bass

Double octave chord

2.3 Pentatonic Scales

The most common pentatonic scales for improvising are the following. We also give the name of the relative minor for the first three.

- The most useful positions are two notes per string.
- They can also be played in the fifteen positions with three and two notes per strings.

Major pentatonic (C) ⇌ Minor pentatonic (A)

Dominant pentatonic (C) ⇌ Dorian pentatonic (G)

Unitonic pentatonic (C)

Diminished pentatonic (C)

Indian pentatonic (C)

Vietnamese pentatonic (C)

Kumoi pentatonic (C) ⇌ Locrian pentatonic (A)

Harmonic major pentatonic (C)

Javanese pentatonic

7#9 pentatonic (C)

Chinese pentatonic (C)

Balinese pentatonic (C)

2.4 Blues Scales

The blues scales can be played as a pentatonic plus the blue note. It can also be played three notes per strings (good for economy picking).

Major blues scale (C) ⇌ Minor blues scale (A)

2.5 Heptatonic Scales

There are seven positions to play these scales, three notes per strings. They are the most useful both for economy picking and slurring.

Diatonic scale (C)

Harmonic minor scale (C)

Minor melodic scale (C)

Harmonic major scale (C)

Hungarian dominant scale (C)

Hungarian minor scale (C)

Neapolitan scale (C)

Harmonic neapolitan scale (C)

Enigmatic scale (C)

2.6 Symmetric Scales

Unitonic scale (C)

Augmented scale (C)

Diminished scale (C)

Chromatic scale (C)

3 GENERALIZATION OF THE CONCEPT OF MODE

Here, we go through all the combinations of a unique melodic element played against an arbitrary bass note. Not all are interesting, but we still list them for completeness.

3.1 Triads

3.1.1 Major

| Substitution | | | | | | | | Play over |
|---------------|----------------|----------------|------------------------|------------------------|------------------------|-----------|---|-------------------------------|
| C/C | 1 | | 3 | | 5 | | 7 | C Δ , C 7 |
| B/C | | 3m/ \sharp 9 | | \flat 5/ \sharp 11 | | | | ... |
| B \flat /C | 9 | | 4/11 | | | \flat 7 | | Cm 7 , C 7^{sus} |
| A/C | \flat 9 | 3 | | | | 13 | | C 7^{alt} |
| A \flat /C | 1 | 3m/ \sharp 9 | | | \sharp 5/ \flat 13 | | | C 7^{alt} |
| G/C | 9 | | | 5 | | | 7 | C Δ , Cm Δ |
| F \sharp /C | \flat 9 | | \flat 5/ \sharp 11 | | | \flat 7 | | C 7^{alt} |
| F/C | 1 | | 4/11 | | | 13 | | C sus , Cm Δ , C 7 |
| E/C | | 3 | | | \sharp 5/ \flat 13 | | 7 | C $\Delta\sharp$ 5 |
| E \flat /C | 3m/ \sharp 9 | | | 5 | | \flat 7 | | Cm 7 , C 7^{alt} |
| D/C | 9 | | \flat 5/ \sharp 11 | | | 13 | | C Δ , C 7 |
| C \sharp /C | \flat 9 | | 4/11 | | \sharp 5/ \flat 13 | | | ... |

3.1.2 Minor

| Substitution | | | | | | | | Play over |
|--------------|---|-------|------|--------|----|----|--|---|
| Cm/C | 1 | 3m/♯9 | | 5 | | | | Cm ^Δ , Cm ⁷ |
| Bm/C | | 9 | | ♭5/♯11 | | 7 | | C ^Δ |

4 DECLINING MELODIC ELEMENTS - DEVELOPING VERSATILITY

4.1 Using the Metronome

Practicing scales and tunes, the metronome does not have to be on each beat. Sylvain LUC showed us how it could be used to develop a good time feel. Here are a few ways to use it.

The image displays six musical examples arranged in two columns of three. The top row shows 'Ballad, ON beat' and 'Ballad, OFF beat'. The middle row shows 'Medium / up-tempo swing' and 'Slow swing'. The bottom row shows 'Fast waltz' and 'Slow waltz'. Each example consists of a single measure of music with a 'C' symbol above it, indicating a specific note or attack point.

4.2 Tremolo

The following patterns can be applied to any melodic element, but they sound particularly good with arpeggios.

4.2.1 By Two

Three musical examples of tremolo patterns by two. The first is labeled 'On time' and shows a steady eighth-note pattern. The second is labeled 'Delayed' and shows a pattern where the first note is delayed. The third is labeled 'Polyrhythmic' and shows a pattern in 12/8 time.

4.2.2 By Three

Four musical examples of tremolo patterns by three. The first two are in 12/8 time: 'On time' (eighth-note pattern) and 'Delayed 2' (delayed eighth-note pattern). The last two are in common time: 'Delayed 1' (delayed sixteenth-note pattern) and 'Polyrhythmic' (sixteenth-note pattern).

4.2.3 By four

Four musical examples of tremolo patterns by four. The first two are in common time: 'On time' (sixteenth-note pattern) and 'Delayed 2' (delayed sixteenth-note pattern). The last two are in 12/8 time: 'Delayed 1' (delayed sixteenth-note pattern) and 'Delayed 3' (delayed sixteenth-note pattern).

4.3 Melodic Patterns

The following patterns should be practiced on all melodic elements, ascending and descending. Those highlighted in grey either contain repetitions or are equivalent to intervallic patterns. They are not necessarily bad, but they sound different.

4.3.1 Groups of three

123 C△ etc.

132 C△ etc.

213 C△ etc.

231 C△ etc.

312 C△ etc.

321 C△ etc.

Delayed 1 C△ etc.

Delayed 2 C△ etc.

Polyrhythmic C△ etc.

4.3.2 Groups of four

1234 C△ etc.

1243 C△ etc.

1324 C△ etc.

1342 C△ etc.

1423 C△ etc.

1432 C△ etc.

2134 C△ etc.

2143 C△ etc.

2314 C△ etc.

2341 C△ etc.

2413 C△ etc.

2431 C△ etc.

3124 C△ etc.

3142 C△ etc.

3214 C△ etc.

3241 C△ etc.

3412 C△ etc.

3421 C△ etc.

4123 C△ etc.

4132 C△ etc.

4213 C△ etc.

4231 C△ etc.

4312 C△ etc.

4321 C△ etc.

Delayed 1 C△ etc.

Delayed 2 C△ etc.

Delayed 3 C△ etc.

Polyrhythmic C△ etc.

4.4 Intervallic Patterns

The following patterns should be practiced on all melodic elements, ascending and descending. When applied to arpeggios or pentatonic scales, the interval jumps are larger than what is indicated for heptatonic scales, but the principle remains the same.

4.4.1 In thirds

Six musical examples for intervallic patterns in thirds:

- Ascending thirds**: Treble clef, key signature of C major (no sharps or flats). The pattern starts at the first note of the staff and moves up by third intervals (C-E-G-B) across the entire staff.
- Descending thirds**: Treble clef, key signature of C major. The pattern starts at the first note and moves down by third intervals (B-G-E-C) across the entire staff.
- Alternating thirds 1**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving up by third intervals.
- Alternating thirds 2**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving down by third intervals.
- Harmonized thirds**: Treble clef, key signature of C major. The pattern consists of quarter notes, starting at the first note and moving up by third intervals.

4.4.2 In fourths

Six musical examples for intervallic patterns in fourths:

- Ascending fourths**: Treble clef, key signature of C major. The pattern starts at the first note and moves up by fourth intervals (C-F-G-C) across the entire staff.
- Descending fourths**: Treble clef, key signature of C major. The pattern starts at the first note and moves down by fourth intervals (C-G-F-C) across the entire staff.
- Alternating fourths 1**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving up by fourth intervals.
- Alternating fourths 2**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving down by fourth intervals.
- Harmonized fourths**: Treble clef, key signature of C major. The pattern consists of quarter notes, starting at the first note and moving up by fourth intervals.

4.4.3 In fifths

Six musical examples for intervallic patterns in fifths:

- Ascending fths**: Treble clef, key signature of C major. The pattern starts at the first note and moves up by fifth intervals (C-G-C-G-C) across the entire staff.
- Descending fths**: Treble clef, key signature of C major. The pattern starts at the first note and moves down by fifth intervals (C-G-C-G-C) across the entire staff.
- Alternating fths 1**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving up by fifth intervals.
- Alternating fths 2**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving down by fifth intervals.
- Harmonized fths**: Treble clef, key signature of C major. The pattern consists of quarter notes, starting at the first note and moving up by fifth intervals.

4.4.4 In sixths

Six musical examples for intervallic patterns in sixths:

- Ascending sixths**: Treble clef, key signature of C major. The pattern starts at the first note and moves up by sixth intervals (C-A-C-A-C) across the entire staff.
- Descending sixths**: Treble clef, key signature of C major. The pattern starts at the first note and moves down by sixth intervals (C-A-C-A-C) across the entire staff.
- Alternating sixths 1**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving up by sixth intervals.
- Alternating sixths 2**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving down by sixth intervals.
- Harmonized sixths**: Treble clef, key signature of C major. The pattern consists of quarter notes, starting at the first note and moving up by sixth intervals.

4.4.5 In sevenths

Six musical examples for intervallic patterns in sevenths:

- Ascending sevenths**: Treble clef, key signature of C major. The pattern starts at the first note and moves up by seventh intervals (C-B-A-C-B-A) across the entire staff.
- Descending sevenths**: Treble clef, key signature of C major. The pattern starts at the first note and moves down by seventh intervals (C-B-A-C-B-A) across the entire staff.
- Alternating sevenths 1**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving up by seventh intervals.
- Alternating sevenths 2**: Treble clef, key signature of C major. The pattern alternates between eighth notes and sixteenth notes, starting at the first note and moving down by seventh intervals.
- Harmonized sevenths**: Treble clef, key signature of C major. The pattern consists of quarter notes, starting at the first note and moving up by seventh intervals.

4.4.6 In octaves

The image shows six musical examples for playing in octaves on a single string. Each example is labeled with a blue 'C' triangle icon above the staff.

- Ascending octaves:** Shows eighth-note patterns moving up the string.
- Descending octaves:** Shows eighth-note patterns moving down the string.
- Alternating octaves 1:** Shows a combination of eighth-note and sixteenth-note patterns.
- Alternating octaves 2:** Shows a different combination of eighth-note and sixteenth-note patterns.
- Harmonized octaves:** Shows eighth-note patterns with harmonic overtones.

Each example includes the text "etc." at the end of the staff.

4.5 Harmonizing Scales

Intervallic patterns can be generalized to breaking down scales into triads and seventh arpeggios. Pentatonic scales can be harmonized in quartal chords, too.

4.5.1 Triads built in thirds

The image shows four musical examples for triads built in thirds. Each example is labeled with a blue 'C' triangle icon above the staff.

- Ascending triads:** Shows eighth-note patterns moving up the scale.
- Descending triads:** Shows eighth-note patterns moving down the scale.
- Alternating triads 1:** Shows a combination of eighth-note and sixteenth-note patterns.
- Alternating triads 2:** Shows a different combination of eighth-note and sixteenth-note patterns.

Each example includes the text "etc." at the end of the staff.

4.5.2 Triads built in fourths

The image shows four musical examples for triads built in fourths. Each example is labeled with a blue 'C' triangle icon above the staff.

- Ascending triads:** Shows eighth-note patterns moving up the scale.
- Descending triads:** Shows eighth-note patterns moving down the scale.
- Alternating triads 1:** Shows a combination of eighth-note and sixteenth-note patterns.
- Alternating triads 2:** Shows a different combination of eighth-note and sixteenth-note patterns.

Each example includes the text "etc." at the end of the staff.

4.5.3 Triads built in fifths

The image shows four musical examples for triads built in fifths. Each example is labeled with a blue 'C' triangle icon above the staff.

- Ascending triads:** Shows eighth-note patterns moving up the scale.
- Descending triads:** Shows eighth-note patterns moving down the scale.
- Alternating triads 1:** Shows a combination of eighth-note and sixteenth-note patterns.
- Alternating triads 2:** Shows a different combination of eighth-note and sixteenth-note patterns.

Each example includes the text "etc." at the end of the staff.

4.5.4 Seventh arpeggios

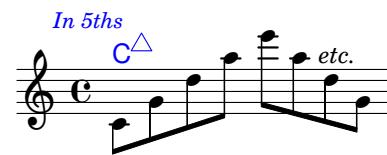

The image shows two musical examples for seventh arpeggios. Each example is labeled with a blue 'C' triangle icon above the staff.

- Ascending arpeggios:** Shows eighth-note patterns moving up the scale.
- Descending arpeggios:** Shows eighth-note patterns moving down the scale.

Each example includes the text "etc." at the end of the staff.

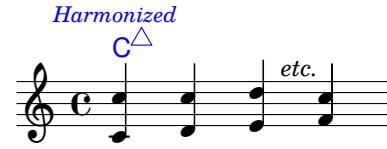

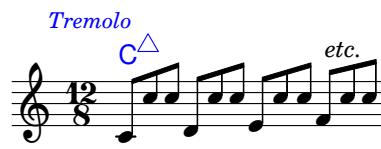

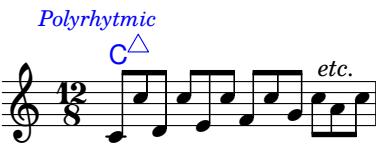

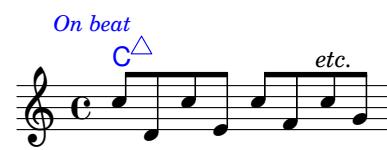

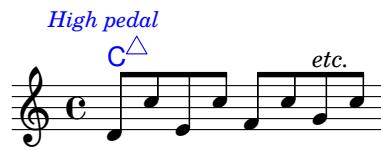

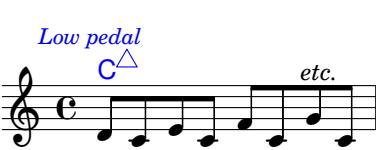

4.5.5 Arpeggios and their upper structure

4.5.6 Pedals

Pedals are another way to play several sounds at the same time. The pedal note is usually a rather neutral tone (root or fifth). Fingerings and picking can be tricky on the guitar.

4.6 Chord Scales

Chord scales can be played using any inversion of any chord form (Drop 2, etc.) on all possible string groups.

4.6.1 Chord scales for the main modes

| Scale or Mode | I ^Δ | IIm ⁷ | IIIIm ⁷ | IV ^Δ | V ⁷ | VIIm ⁷ | VII ^Ø | |
|-------------------|------------------|--------------------|---------------------|--------------------|-------------------|--------------------|---------------------|---------------------|
| Ionian | I ^Δ | | | | | | | |
| Dorian | Im ⁷ | IIIm ⁷ | bIII ^Δ | IV ⁷ | Vm ⁷ | VI ^Ø | bVII ^Δ | |
| Phrygian | Im ⁷ | bII ^Δ | | IVm ⁷ | V ^Ø | bVI ^Δ | bVIIIm ⁷ | |
| Lydian | I ^Δ | II ⁷ | | | #IV ^Ø | V ^Δ | VIm ⁷ | VIIIm ⁷ |
| Mixolydian | I ⁷ | IIIm ⁷ | | IV ^Δ | Vm ⁷ | VIIm ⁷ | bVII ^Δ | |
| Aeolian | Im ⁷ | II ^Ø | bIII ^Δ | IVm ⁷ | Vm ⁷ | bVI ^Δ | bVII ⁷ | |
| Locrian | I ^Ø | bII ^Δ | bIIIIm ⁷ | bV ^Δ | bVI ⁷ | | bVIIIm ⁷ | |
| Minor melodic | Im ^Δ | IIIm ⁷ | bIII ^{Δ#5} | IV ⁷ | V ⁷ | VI ^Ø | VII ^Ø | |
| Javanese | Im ⁷ | bII ^{Δ#5} | bIII ⁷ | IV ⁷ | V ^Ø | VI ^Ø | bVIIIm ^Δ | |
| Lydian augmented | I ^{Δ#5} | II ⁷ | | III ⁷ | #IV ^Ø | #V ^Ø | VIm ^Δ | VIIIm ⁷ |
| Lydian dominant | I ⁷ | II ⁷ | | III ^Ø | #IV ^Ø | Vm ^Δ | VIm ⁷ | bVII ^{Δ#5} |

| Diminished | I ^{Ø7} | II ^{Ø7} | bIII ^{Ø7} | | IV ^{Ø7} | bV ^{Ø7} | bbVII ^{Ø7} | VII ^{Ø7} |

4.6.2 The Barry HARRIS Approach (Parallel Motion)

Besides regular chord scales, it is possible to link the successive inversions of a chord with diminished passing chords. It is a particular application of harmonized bebop scales. This trick can be applied to any heptatonic scale with either a major sixth or a minor seventh. The diminished passing chord corresponds to the major seventh (chord tone or passing tone), ninth, eleventh and minor sixths (passing tone) or $\flat 13$. Here are examples in Drop 2, for the most common chords.

C⁶ chord scale (harmonized ionian be-bop scale)

C⁶ D⁰⁷ C⁶/E F⁰⁷ C⁶/G A_b⁰⁷ C⁶/A etc. B⁰⁷

Cm⁶ chord scale (harmonized minor melodic be-bop scale)

Cm⁶ D⁰⁷ Cm⁶/E_b F⁰⁷ Cm⁶/G A_b⁰⁷ Cm⁶/A etc. B⁰⁷

C7 chord scale (harmonized aeolian dominant be-bop scale)

C⁷ D⁰⁷ C⁷/E F⁰⁷ C⁷/G A_b⁰⁷ C⁷/B_b etc. B⁰⁷

Cm⁷ chord scale (harmonized aeolian be-bop scale)

Cm⁷ D⁰⁷ Cm⁷/E_b F⁰⁷ Cm⁷/G A_b⁰⁷ Cm⁷/B_b etc. B⁰⁷

C \emptyset chord scale (harmonized locrian melodic be-bop scale)

C \emptyset D⁰⁷ C \emptyset /E_b F⁰⁷ C \emptyset /G_b A_b⁰⁷ C \emptyset /B_b etc. B⁰⁷

C \circ ⁷ chord scale (harmonized diminished scale)

C \circ ⁷ D⁰⁷ C \circ ⁷/E_b F⁰⁷ C \circ ⁷/G_b A_b⁰⁷ C \circ ⁷/A etc. B⁰⁷

C⁷ \flat 5 chord scale

C⁷ \flat 5 D⁰⁷ C⁷ \flat 5/E F⁰⁷ C⁷ \flat 5/G_b A_b⁰⁷ C⁷ \flat 5/B_b etc. B⁰⁷

In practice, the system taught by Barry HARRIS focuses on four of these scales:

1. Major diminished (ionian be-bop);
2. Minor diminished (minor melodic be-bop);
3. Dominant diminished (aeolian be-bop);
4. Dominant $\flat 5$ diminished.

Barry Harris's system makes parallel (see above), oblique and contrary motions much easier.

4.6.3 Oblique Motion (Barry HARRIS)

To go through the different chord tones, keeping the bass constant, we just need to cycle through the different chord voicings (octave chord, Drop 2, Drop 3, Drop 2,4, double octave chord, and back), for all chord qualities. In C⁶:

A musical staff in C major (G clef) showing eight different voicings for a C6 chord. The chords are labeled: 8ve chord, Drop 2, Drop 3, Drop 2,4, Double 8ve chord, Drop 2,4, Drop 3, Drop 2.

It also works for all other inversions. In C⁶/E:

A musical staff in C major (G clef) showing eight different voicings for a C⁶/E chord. The chords are labeled: 8ve chord, Drop 2, Drop 3, Drop 2,4, Double 8ve chord, Drop 2,4, Drop 3, Drop 2.

In C⁶/G:

A musical staff in C major (G clef) showing eight different voicings for a C⁶/G chord. The chords are labeled: 8ve chord, Drop 2, Drop 3, Drop 2,4, Double 8ve chord, Drop 2,4, Drop 3, Drop 2.

In C⁶/A:

A musical staff in C major (G clef) showing eight different voicings for a C⁶/A chord. The chords are labeled: 8ve chord, Drop 2, Drop 3, Drop 2,4, Double 8ve chord, Drop 2,4, Drop 3, Drop 2.

Inversely, we can cycle through the same chord voicing sequence if one wants to keep the soprano voice constant and vary the bass note. In C⁶:

A musical staff in C major (G clef) showing eight different voicings for a C⁶ chord, with the bass note changing each time. The chords are labeled: Double 8ve chord, Drop 2,4, Drop 3, Drop 2, 8ve chord, Drop 2, Drop 3, Drop 2,4.

and so on for all the other inversions.

4.6.4 Contrary Motion (Barry HARRIS)

It is possible to have the bass and soprano voices to move contrarily along the scales. Thomas ECHOLS calls that the "elevator". In C⁶, it gives:

A musical staff in C major (G clef) showing a bass line and a soprano line moving contrarily. The bass line is labeled: Unisson, Third, Triad, Shell chord, 8ve chord, Drop 2, Drop 3, Drop 2,4. The soprano line is labeled: Double 8ve chord, Drop 2,4, Drop 3, Drop 2, 8ve chord, Shell chord, Triad, Third.

4.6.5 Quartal harmony

Scales can also be harmonized in quartal triads and sevenths chords. My personal taste however makes me lean more toward the harmonization of "no-avoid-note scales", in a more modal context.

A musical staff in C major (G clef) showing a harmonic progression based on quartal triads. The key signature is C major. The first note is C with a triangle symbol above it. The chords are labeled: etc.

D dorian mode harmonized in quartal seventh chords

Quartal chords can also be inverted the same way as regular chords.

Dm⁷ quartal chord inversions

Quartal harmony works particularly well with pentatonic scales.

C major pentatonic harmonized in quartal triads

4.7 Rhythmic Patterns

The following rhythmic patterns can be applied either to ternary or binary beats provided that the total number of counts is conserved. For instance, the four-on-six patterns can be played these two different ways:

Application 1 *Application 2*

There are many more patterns, but four notes is a good base, as it is the way we conceive improvisation in Jazz (four notes of a seventh arpeggio, four-note scale fragment, Coltrane patterns on *Giant Steps*, etc.).

5 IMPROVISING THROUGH CHORD CHANGES

5.1 Chord/Scale Relation

We list the most obvious melodic elements to play on different types of chords. More combinations are possible, but these are a good start. The substituted arpeggios can be incorporated into solo lines or as block chords.

5.1.1 Most common chords

Table 1: Major seventh chord (C^Δ)

| Melodic element | 1 | 3 | 5 | 7 | 9 | $\sharp 11$ | 13 |
|----------------------------|---|---|---|---|---|-------------|----|
| C lydian mode | 1 | 3 | 5 | 7 | 9 | $\sharp 11$ | 13 |
| C major pentatonic | 1 | 3 | 5 | | 9 | | 13 |
| G major pentatonic | | 3 | 5 | 7 | 9 | | 13 |
| D major pentatonic | | 3 | | 7 | 9 | $\sharp 11$ | 13 |

5.1.3 Derived chords

Several commonly used chords are the inversion of other ones.

| Major tonality chord | Chord equivalent | Minor tonality chord | Chord equivalent |
|---|---|--|--|
| C ⁶ (C lydian) | ↔ Am ⁷ /C (A dorian) | Cm ⁶ (C minor melodic) | ↔ A [∅] /C (A locrian melodic) |
| G ^{9sus} (G mixolydian) | ↔ Dm ⁷ /G (D dorian) | G ^{7b9sus} (G javanese) | ↔ D [∅] /G (D locrian melodic) |
| G ^{7b9} (G diminished dominant) | ↔ D ^{°7} /G (D diminished dominant) | G ^{7b9b5} (G superlocrian) | ↔ D♭ ⁷ /G (D♭ lydian dominant) |

5.2 Forward Motion

5.2.1 Resolution

To make good sounding phrases, it is important to resolve chord tones on the strong beats. This resolution is heard better if it is:

- down from a scale tone;
- up from a chromatic tone;
- down a fifth;
- up a fourth.

For instance, resolving A^{7alt} to Dm⁶ can look like that:

The way to implement these resolutions using arpeggios, scales and their respective patterns, with octave displacement are virtually infinite. For instance:

5.2.2 Bebop scales

Bebop scales are an easy way to make sure that, when played ascending or descending, we have a chord tone on each strong beat. For heptatonic scales, bebop scales are built by adding a chromatic passing tone:

- On the minor sixth, for major and minor sixth cords;
- On the major seventh, for chords having a minor sevenths.

We note that we can not build a scale for chords with a major sevenths, as there is not room between this tone and the root. We also note that the diminished scale is already synchronized. Played in eight notes, we have the following bebop scales, among many others.

G mixolydian bebop scale

D dorian bebop scale

Bebop scales can also be played in triplet. On the guitar, they sound good played three notes per string, with the middle note (the second on each string) on the beat. This way, it gives a natural accent on the up beat, and can accommodate slurring as well as economy picking.

G mixolydian bebop scale

D dorian bebop scale

That way, we still get a chord tone on beats one and three.

5.2.3 The most useful Jazz trick

From a practical point of view, it is not always easy to improvise nice phrases across chord changes, as we have to visualize/hear two different chords at once, and target different chord tones. A highly effective shortcut to that problem consists in learning what are the tones of the next chord in the reference frame of the current chord. It gets even simpler if we also realize that the majority of chord changes in Jazz standards are going to a chord a fourth higher (or a fifth lower), such as in a VI II V I IV changes:

| Current chord | Next chord |
|--------------------|---------------------|
| VI ^{7alt} | ↔ IIIm ⁷ |
| IIIm ⁷ | ↔ V ⁷ |
| V ⁷ | ↔ I ^Δ |
| I ^Δ | ↔ IV ^Δ |
| II ^ø | ↔ V ^{7alt} |
| V ^{7alt} | ↔ Im ⁶ |
| 4 | ↔ 1 |
| 6m | ↔ 3m |
| 6 | ↔ 3 |
| 7 | ↔ b5 |
| 1 | ↔ 5 |
| 2m | ↔ #5 |
| 2 | ↔ 6 |
| 3m | ↔ b7 |
| 3 | ↔ 7 |
| b5 | ↔ b9 |
| 5 | ↔ 9 |

In other words, when playing across a IIIm⁷ V⁷ change, thinking about resolving the IIIm⁷ on its sixth can lead to smoother phrases than thinking about the third of the V⁷, although both are the same note (B in C major).

Tritone substitutions are also useful to know:

| Current chord | Next chord |
|------------------|-------------------|
| bII ⁷ | ↔ I ^Δ |
| bII ⁷ | ↔ Im ⁶ |
| bII ⁷ | ↔ I ⁷ |
| 7 | ↔ 1 |
| 2 | ↔ 3m |
| 3m | ↔ 3 |
| b5 | ↔ 5 |
| 6m | ↔ 6 |
| 6 | ↔ b7 |
| b7 | ↔ 7 |
| 2m | ↔ 9 |

Backdoor resolution:

| Current chord | Next chord |
|---------------------|-----------------------------------|
| $\flat\text{VII}^7$ | $\leftrightarrow \text{I}^\Delta$ |
| $\flat\text{VII}^7$ | $\leftrightarrow \text{Im}^6$ |
| $\flat\text{VII}^7$ | $\leftrightarrow \text{I}^7$ |
| 2 | $\leftrightarrow 1$ |
| 4 | $\leftrightarrow 3m$ |
| $\flat 5$ | $\leftrightarrow 3$ |
| 6 | $\leftrightarrow 5$ |
| 7 | $\leftrightarrow 6$ |
| 1 | $\leftrightarrow \flat 7$ |
| 2m | $\leftrightarrow 7$ |
| 3 | $\leftrightarrow 9$ |

The difficult transition in Coltrane changes (*Countdown, Giant Steps*):

| Current chord | Next chord |
|-------------------|--------------------------------|
| I^Δ | $\leftrightarrow \text{III}^7$ |
| 3m | $\leftrightarrow 1$ |
| 5 | $\leftrightarrow 3$ |
| $\flat 7$ | $\leftrightarrow 5$ |
| 2m | $\leftrightarrow \flat 7$ |
| 4 | $\leftrightarrow 9$ |

5.3 Common Chord Changes

Comping and improvising through chord changes can be greatly simplified if we work out specific chord patterns that are all over the place in standards. These changes can be practiced in all keys, all tempos and all chord durations (2/4, 3/4, 4/4, etc.).

5.3.1 Two-chord changes

Once we can improvise on one chord, the next step before going to a full 32-bar standard is to develop a vocabulary over two-chord changes. The most useful ones are the following.

| Name | First chord | Second chord |
|--------------------------|-------------------------|--------------------|
| Major perfect cadence | V^7 | I^Δ |
| Minor perfect cadence | V^7 | I^6 |
| Dominant perfect cadence | V^7 | I^7 |
| Major plagal cadence | I^Δ | IV^Δ |
| Minor plagal cadence | I^6 | IV^6 |
| Dominant plagal cadence | I^7 | IV^7 |
| Major II V | IIIm^7 | V^7 |
| Minor II V | II^\varnothing | V^7 |

5.3.2 II V I's

II V I are the building blocks of Jazz standards. There are a few common substitutions (in the key of C):

| Name | II | V | I |
|-----------------------|----|----------------------------|--------------------|
| Major | | Dm^7 | G^7 |
| Tritone sub. | | A^\flatm^7 | $\text{D}^\flat 7$ |
| Backdoor | | Fm^7 | $\text{B}^\flat 7$ |
| Minor | | D^\varnothing | G^7 |
| Minor w/ tritone sub. | | D^\varnothing | $\text{D}^\flat 7$ |

5.3.3 Major and minor tonal cycles

The following are found in many A A B A standards.

Major cycle in C

F Δ B \emptyset Em 7 Am 7
Dm 7 G 7 C Δ C 7

Minor cycle in C

Fm 7 Bb 7 Eb Δ Ab Δ
D \emptyset G 7 Cm 6 C 7

5.3.4 Major blues

Roots blues in C

C 7 F 7 C 7
F 7 C 7
G 7 F 7 C 7 G 7

Jazz blues in C

C 7 F 7 C 7 C 7
F 7 F \sharp 97 C 7 A 7 \flat
Dm 7 G 7 C 7 G 7

Variations adding II Vs

C 7 F 7 F \sharp 97 C 7 Gm 7 C 7
F 7 F \sharp 97 C 7 Dm 7 Em 7 A 7 \flat
Dm 7 G 7 C 7 A 7 \flat Dm 7 G 7

Variations with tritone substitutions

C 7 F 7 C 7 F \sharp 97
F 7 F \sharp 97 C 7 E \flat
Dm 7 D \flat 97 C 7 D \flat 97

5.3.5 Minor blues

Basic grid in C

Cm C 7 \flat
Fm Cm
Ab 7 G 7 Cm G 7

Variation with line-clichés

Cm Cm Δ Cm 7 Cm 6 Cm Cm Δ Cm 7 Cm 9
Fm Fm Δ Fm 7 Fm 6 Cm Cm Δ Cm 7 Cm 6
Ab 7 G 7 Cm D \emptyset G 7 \flat

5.3.6 Swedish blues

A good II V workout:

The first staff shows chords: C[△], B⁹, E⁷ b⁹, Am⁷, D⁷, Gm⁷, C⁷. The second staff shows: F⁷, Fm⁷, B♭⁷, Em⁷, A⁷, Eb⁹m⁷, A♭⁷. The third staff shows: Dm⁷, G⁷, C[△], A⁷ b⁹, Dm⁷, G⁷.

5.3.7 Rhythm changes

The structure of rhythm changes is A A B A. Here are a few common variations on the A.

Original A (in C)

The first staff shows: C[△], A⁷ b⁹, Dm⁷, G⁷, Em⁷, A⁷ b⁹, Dm⁷, G⁷. The second staff shows: C[△], A^{△/E}, F[△], F♯⁹⁰⁷, C^{△/G}, G⁷/B, C[△].

Variations on the A (in C)

The first staff shows: C[△], A⁷ b⁹, Dm⁷, G⁷, Em⁷, A⁷ b⁹, Dm⁷, G⁷. The second staff shows: Gm⁷, C⁷, F[△], Fm⁷, Em⁷, A⁷, Dm⁷, G⁷, 1. Dm⁷, G⁷, 2. Dm⁷, G⁷, C[△].

Original B (in C)

The first staff shows: E⁷, A⁷. The second staff shows: D⁷, G⁷.

Variations on the B (in C)

The first staff shows: Bm⁷, E⁷, Em⁷, A⁷. The second staff shows: Am⁷, D⁷, Dm⁷, G⁷.

5.3.8 Coltrane changes

This is the A of *Countdown*.

Dm⁷, Eb⁹, Ab[△], B⁷, Eb[△], G⁷, C[△].

5.4 Reharmonization Techniques

Reharmonization is a big deal in Jazz. The following possibilities can be applied to comping and soloing. Some are very smooth sounding, some can be spicy.

5.4.1 Dominant chords

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled G^7 . The second measure is empty.

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled G^7 . The second measure is empty.

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $G^{7\flat 9}$. The second measure is empty.

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled Dm^7 . The second measure is empty. The third measure shows a single note on the first string at the 3rd fret, labeled G^7 .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $D\flat^7$. The second measure is empty.

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $A\flat^7$. The second measure is empty.

Diminished dominant substitution:

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled G^7 . The second measure shows a single note on the first string at the 3rd fret, labeled C .

If the melody is neither A nor E♭

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $G^{7\flat 9\flat 13}$. The second measure shows a single note on the first string at the 3rd fret, labeled C .

Superlocrian dominant substitution:

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled G^7 . The second measure shows a single note on the first string at the 3rd fret, labeled C .

If the melody is neither A nor E

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $G^{7\flat 9\flat 13}$. The second measure shows a single note on the first string at the 3rd fret, labeled C .

Tritone substitutions:

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled E^7 . The second measure shows a single note on the first string at the 3rd fret, labeled C .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $B\flat^7\sharp 11$. The second measure shows a single note on the first string at the 3rd fret, labeled C .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled D^7 . The second measure shows a single note on the first string at the 3rd fret, labeled Dm^7 .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $D^7\sharp 11$. The second measure shows a single note on the first string at the 3rd fret, labeled Dm^7 .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled E^7 . The second measure shows a single note on the first string at the 3rd fret, labeled C .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $B\flat^7\sharp 11$. The second measure shows a single note on the first string at the 3rd fret, labeled C .

Lydian dominant substitution:

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled D^7 . The second measure shows a single note on the first string at the 3rd fret, labeled Dm^7 .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $D^7\sharp 11$. The second measure shows a single note on the first string at the 3rd fret, labeled Dm^7 .

Unitonic dominant substitution:

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled G^7 . The second measure shows a single note on the first string at the 3rd fret, labeled C .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $G^7\sharp 5$. The second measure shows a single note on the first string at the 3rd fret, labeled C .

Bluesy static dominant chord:

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled C^7 .

A musical staff in G major (one sharp) with a common time signature. It shows a single note on the first string at the 3rd fret, labeled $C^7\sharp 9$.

5.4.2 Minor chords

Musical staff showing Cm⁷ and F⁷ chords.

Musical staff showing Cm⁷ and F⁷ chords.

Musical staff showing Cm⁶ and F⁷ chords.

Musical staff showing Cm[△] and F⁷ chords.

Chromatic Elaboration of Static Harmony (CESH) or *line-cliché*:

Musical staff showing Cm⁷ chord.

Musical staff showing Cm⁷ chord.

Musical staff showing Cm, Cm[△], Cm⁷, and Cm⁶ chords.

Musical staff showing Cm, Cm⁶, Cm⁶, and Cm⁷ chords.

Deceptive cadence:

Musical staff showing Dm⁷ and G⁷ chords.

Musical staff showing D⁰ and G⁷ chords.

Tonic minor resolution:

Musical staff showing Dm⁷ and G⁷ chords.

Musical staff showing D⁷ and G⁷ chords.

Secondary dominant substitution:

Musical staff showing Dm⁷ and G⁷ chords.

Musical staff showing Am⁷ and Dm⁷ chords.

Musical staff showing D⁷ and G⁷ chords.

Musical staff showing A⁷ and Dm⁷ chords.

5.4.3 Major chords

Musical staff showing C[△] chord.

Musical staff showing C⁶ chord.

Musical staff showing C[△] chord.

Musical staff showing C^{6⁹} chord.

Musical staff showing C[△] chord.

If the melody is not F
C^{lyd}

Musical staff showing C[△] chord.

Musical staff showing C[△] chord.

If the melody is E or B
C^{△#5}

Musical staff showing C^{△#5} chord.

Musical staff showing C[△] chord.

Musical staff showing C^{△#5} and C[△] chords.

5.5 Practicing Standards

Here is a non-exhaustive list of some things to practice when working on a tune. Not all are possible. We can not practice the same way a ballad and an up-tempo bebop tune, but all these ideas are worth considering.

5.5.1 Listening

1. Listen to different versions of the tune. Check the differences in tonality, phrasing, harmony, etc.
2. Come up with a preferred version (write it up). If this tune will be mainly played in a band, it can be reharmonized and modified. Otherwise, if it is a standard to be played with random people, it should not be far from the *Real Book* version.
3. Listen to the contrast in dynamics and texture between the theme and the solos, and between the A and the B, and try to reproduce it in the following.
4. Prepare a backing track. Try also to play with the record.

5.5.2 Exposing the melody

Single notes. Practice the melody in different areas of the neck and different registers.

1. Adapt the fingering to optimize the phrasing (slurs, slides, etc.).
2. Try adding embellishments to the harmony:
 - Appoggiatura and other effects;
 - Tags and pick-ups;
 - Rhythmic variations.
3. If the melody has some space, try out questions and answers:
 - Answer the melody with other melodic phrases;
 - Answer it with chord voicings.

Harmonized melody. It is not always possible to systematically achieve these over the whole tune. However, it might be possible on some particular fragments.

1. Try all possible dyad harmonization:
 - Octave;
 - Thirds;
 - Tenthths;
 - Sixths;
 - Fourths;
 - Fifths;
 - Sevenths;
 - Seconds.
2. Also try harmonizing the melody with non-constant intervals:
 - Contrary motions;
 - Pedals.
3. Harmonize the melody in chords without a bass (arbitrary inversions). This harmonized melody is meant to be played with a bass player.
 - In triads (including quartal triads) to highlight the upper structure of the chord.
 - In seventh chords.

Solo chord melody. The following are meant to be played without accompaniment, either as a standalone version of the tune, or as an intro to a band version.

1. Work out a melody with chords and their bass. It does not have to be dense and can be played *rubato*, with embellishments between chords.
2. Work out a melody with a bass line. If possible the bass line can be a walking bass.
3. Work out a full chord melody, like a composed classical piece.

5.5.3 Comping

1. Look for rhythmic patterns matching the vibe of the tune. In doubt, try all possible combinations.
2. Practice all chord forms and inversions on the tune.
3. Explore the sound of different enrichments (9, 11, 13).
4. Try out different reharmonizations.
5. Practice approaching the next chords with:
 - Chromatic movements;
 - Diatonic/diminished movements;
 - Same but with a special treatment for the higher voice (constant or contrary motion; examples in Pierre CULLAZ's book).
6. Play the tune with shell chords, in quarter notes. On fast tempos, change chords every bar. On slower tempos, try moving the chords smoothly to the next. Use diatonic or diminished passing chords.
7. Practice improvising walking bass lines.
8. Practice improvising walking bass lines with chord fragments (Tuck ANDRESS's way).
9. Look for original approaches:
 - Slaps;
 - Pick vs fingerstyle;
 - Compose riffs and find chord licks;
 - Use open strings;
 - Try out different sounds (equalization, combination of pick-ups, pedals, etc.).

5.5.4 Soloing

1. Listen to other people's solos. Transcribe them if they are particularly great.
2. If the tune is particularly hard, compose a few solos to break it.
3. Practice forward motion with scales, arpeggios and pentatonics. Exhaust all the possible resolutions from one chord to another. Also find out the common chord tones. **This is where most of the work is...**
4. Look for original approaches:
 - Open strings;
 - Pinched harmonics;
 - Use of effect pedals;
 - Exotic scales.
